

EPS-Foams

Product Information

Product:	EPS-Model-Foam VFG 18			
Product Description:	VFG 18 - Model Foam has been specifically developed for the fabrication of Lost-wax casting and full-mold casting of parts.			
	VFG 18 - Model Foam is a finely granulated carefully welded Polystyrene hard foam with high indentation hardness and excellent machining properties. The even granulation eliminates the need for additional treatment after milling which reduces costs while resulting in a pleasing surface grain of the cast parts. The excellent Edge stability is also an additional advantage.			
	VFG 18 – Model Foam has a very low solid fraction of just 1.8-2% resulting in almost residue-free gasification in casting processes.			
	VFG 18 – Model Foam has been in service in high volume for many years by many well known fabricators in the Steel, Iron, Aluminium- and Zamak Casting industries, without complaints.			
Technical Data:				
Size:	In Stock: Sheet Length: 2000 or 4000mm Sheet Width: 1000 or 1250mm Sheet Thickness: 10 – 500mm			
	Other Sizes are available upon request			
Tolerances:	Sheet length an Sheet thickness			
Gross Density:	19 kg +/- 1 kg	(DIN 53420)		
Parallelism Deviation:	max. 1 mm (!!)	(Company Standard)		
Planar Tolerance:	max. 0,1 % (at 2 m-Lengths) max. 0,2 % (at 4 m-Lengths) (Company Standard)			
0	Standard	Unit	Value	
Compression Stress at 10 % Compression:	EN 826	kPa	100	
Shear Strength:	EN 12090	kPa	75 – 135	
Tensile Strength:	EN 1607	kPa	185 – 280	
Bending Strength	ISO 1209	kPa	150 – 270	
Heat Distortion Temperature:	DIN 18164	°C	80 – 85
